

BKS | Pillow Fiber Opening Machine

Functions & Applications

BKS is a professional core equipment for pillow production, specially designed for opening and loosening pillow filling materials such as chemical fiber cotton and PP cotton. Equipped with an 8.25kw high-power motor, it achieves stable processing of 300-350kg/h, and the opened cotton can be directly used for filling high-end products.

Model	BSM-350
Capacity	300~350kg/h
Work Voltage	220V/60Hz
Motor Power	8.25KW
Air Pressure	0.4~0.5MPa
Dimensions	2200*1300*1180mm
